Sample prices:

The boards can be connected with each other by assembling ready modules next to each other.

The widths of the profiles can also be freely combined with each other.

Main Panel mounted above the modules ...

... on individual request - we can make the main panel with a logo or any graphic information.

Thanks to ready-made modules, the transport of boards is trouble-free and cost-effective.

Boards can be finished on the side with an aluminum profile (44 EUR 1 mb.), but the operation (information exchange) without a side profile is more functional for the user.
