Gross price for 1 pc.: **92,25 PLN**

Quantity in package: **10**

Net price: **750,00 PLN**

Gross price: **922,50 PLN**

Guide paths for the visually impaired and blind consist of convex lines and dots.

The guide lines are the so-called guide path along which the visually impaired move.

The path usually consists of 3-6 lines in a row.

The guide path ends with a note field, i.e. a field with tactile bumps.

The note field informs about an obstacle on the way (stairs, doors, elevator, reception), a change in the direction of the path or the end of the guide path.

The ordering party should inform about the number of note fields and dimensions - this results from the design or arrangements with the investor.

Lines from a polyurethane guide strip with the following dimensions:

length 295mm, width 35mm, height 5mm.

Available colors: black, yellow, white, gray. The strip is glued with glue.

We offer two types of solutions for guide paths:

Guide strip – length 295mm, width 35mm, height 5mm.
